Office Action Summary

Art Unit: 1617

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11, 19-24, 26, 28, 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ribier et al (6,071,524).

Ribier et al '524 teach a dermatological composition comprising cubic gel particles reading on the claimed cubic gel particles (abstract, column 1 lines 21-36).

Applicants stipulate pollutants such as ozone, carbon monoxide, nitrogen oxides and sulphur dioxides (page 1 lines 16-18), All of which are oxidizing agents.

Additionally, applicants stipulate heavy metals as pollutants, which inhibit cellular defenses against free radicals.

It would have been obvious to use the composition of Ribier et al '524 to protect keratin materials from pollutants in view of the known action of such pollutants as oxidants and inhibitors of cellular defenses against free radicals and the presence of antioxidants and free radical scavengers in the Ribier et al' 524 composition to counteract such oxidants and bolster cellular defense against free radicals with exogenous free radical scavengers.

Claims 1-11, 19-24, 26, 28-30 are rejected.

Claims 12-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
